

Exercise 1 If you know that $\lim_{x \rightarrow 6} \frac{f(x)}{x} = 5$ and $\lim_{x \rightarrow 6} g(x) = 2$, then evaluate the following limit:

Hint: Multiply numerator and denominator by x .

$$\lim_{x \rightarrow 6} \frac{f(x)}{g(x)} = \boxed{15}$$

Exercise 2 If you know that $\lim_{x \rightarrow 6} \frac{f(x)}{x} = 5$ and $\lim_{x \rightarrow 6} g(x) = 2$, then evaluate the following limit:

Hint: Multiply $f(x)$ by $\frac{x}{x}$.

$$\lim_{x \rightarrow 6} f(x) = \boxed{30}$$

Exercise 3 If you know that $\lim_{x \rightarrow 6} \frac{f(x)}{x} = 5$ and $\lim_{x \rightarrow 6} g(x) = 2$, then evaluate the following limit:

Hint: Use the result in previous exercise.

$$\lim_{x \rightarrow 6} (f(x) - 9g(x)) = \boxed{12}$$

Exercise 4 If you know that $\lim_{x \rightarrow 6} \frac{f(x)}{x} = 5$ and $\lim_{x \rightarrow 6} g(x) = 2$, then evaluate the following limit:

$$\lim_{x \rightarrow 6} (f(x)(x - g(x))) = \boxed{120}$$
